

Dreamax DMX-ST7A Speaker Replacement

Replace the speaker.

Written By: Stacey Mattila

INTRODUCTION

Replace the speaker via soldering.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
 - [Solder](#) (1)
 - [Portable Soldering Iron](#) (1)
-

Step 1 — Back Cover

- Position the tablet so the ports and screws are facing you.

Step 2

- Remove the two 2.5mm screws using the Phillips #00 precision screwdriver.

Step 3

- Use the plastic opening tool to assist in removing the back cover.

Step 4

- Upon removing the back cover position the tablet as seen in the picture.

Step 5 — Speaker

- Remove the speaker from the back cover.

Step 6

- Remove the black and red wire from the Motherboard.

Step 7

- Install the new speaker by soldering the wires to the motherboard. For additional soldering instructions please view this page: [How To Solder and Desolder Connections](#)

To reassemble your device, follow these instructions in reverse order.
